-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Art Unit: 1761

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on January 4, 2005 has been entered.

2. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

3. Claims 1-4 and 12-15 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter, which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. There is no support in the original disclosure for: "in a single immersion" (claim 1); "at least 25⁰F" (claim 2); and "a single time" (claim 12). Corrections are required.

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claims 1-15 are rejected under 35 U.S.C. 103(a) as being unpatentable over The Good Cook literature article.

The article is described in paragraph no. 3, Paper No. 032404. Applicant is also referred to the reasoning set forth in paragraph no. 6, Paper No. 082504.

6. Claims 1-15 are also rejected under 35 U.S.C. 103(a) as being unpatentable over Strong.

Applicant is referred to the reasoning set forth in paragraph no. 4, Paper No. 032404 and in paragraph no. 6, Paper No 082504.

7. Applicant's arguments filed December 2, 2004 have been fully considered but they are not persuasive. Despite applicant's contention to the contrary, the liquid volume of the marinade in the literature article is sufficient for the chicken slices to fully absorb the marinade. Further, the marinade contact time in the literature article may be minimal, which is consistent with applicant's claimed time limits (claims 3, 4, 7 and 12), since the chicken slices can either be cooked "right away" after contact with the marinade or covered and kept in the refrigerator for up to 24 hours. Nevertheless, applicant's marinating time is not considered to be critical and in the absence of unexpected results can be accorded no patentable weight.

Although Strong uses chicken pieces, as opposed to chicken slices, there is no patentable distinction between these 2 sizes of chicken parts. Further, the repeated lifting of the chicken pieces in and out of the marinade in Strong, as pointed out by applicant, with eventually result in full absorption of the marinade by the chicken pieces therein.

Art Unit: 1761

Applicant's contention, that Strong teaches away from immersing the chicken pieces in a marinade or seasoning solution a single time or for a single time period, is not commensurate in scope with applicant's claims, none of which recite either of these limitations.
